OPINIONS

EDITORIAL: Bursting the filter bubble, algorithms vs. reality

Many users do not consider that although social sites present themselves as free social networks, there are still costs associated with their use. As these platforms have developed, the price has become the perception of our reality. [Read Article](#)

COMMENTARY: DNA sampling expands to unethical usage

Most people use the kits and give DNA samples for their own personal use without thinking how their data could later be used. Some have shared concerns that they will unknowingly be involved in the criminal prosecuting of their relatives, known or unknown. [Read Article](#)
